The DiSTI Corporation Completes Quality Management System Re-Certification

The Orlando-based Simulation and Training Company successfully completes ISO 9001:2015 recertification audit

Orlando, FL (June 21, 2021) – Leading training and simulation company, The DiSTI Corporation, announced today that they have completed their ISO 9001:2015 recertification audit. The extensive review process took place in late April. The audit included a thorough vetting and examination of DiSTI dedication to exceeding customer requirements, on-time delivery, innovation, continuous improvement, and effectiveness in monitoring customer satisfaction.

ISO 9001:2015 is a globally recognized quality management standard developed and published by the International Organization for Standardization (ISO). The certification provides a model for companies of all types and sizes to build an effective quality management system.

"I am extremely proud of the team at DiSTI for this achievement," stated DiSTI CEO John Hayward. "This recertification is a result of a company-wide commitment to exceptional quality while providing the best possible products and services to our clients. We are dedicated to constant improvement and maintaining our ISO 9001:2015 accreditation ensures we have the processes and systems in place for this."

DiSTI recertification audit was conducted by Perry Johnson Registrars, Inc., an accredited certification body. The audit validated improvements to the DiSTI quality program in keeping with the ISO 9001:2015 standard's 'process' oriented approach with additional focus on risk-based thinking, expanding to a broader organizational context, addressing needs and expectations of interested parties, and collection and sharing of organizational knowledge.

###
