**STARK Learning selects VE Studio for Virtual Training Solutions Development**

*Becomes DiSTI's VE Studio Certified Solutions Partner for the Netherlands*

**Orlando, FL (April 15th, 2019)** - The DiSTI Corporation, the world's leading provider of 3D virtual training solutions, announces that STARK Learning, headquartered in the Netherlands, as the newest VE Studio Certified Solutions Partner. STARK Learning specializes in creating innovative digital learning solutions for industrial, energy and education sectors.

According to Milan Vogelaar, Managing Director of STARK Learning, "we are experiencing growing demand from enterprise customers wanting to implement virtual and augmented reality technology to improve skills, operational, and maintenance procedural training. To provide scalable solutions that fit our customers' requirements, we selected VE Studio."

The initial attraction to VE Studio was the robust feature set and in use by leading Aerospace, Automotive and Energy companies around the world. After conducting a detailed technical and financial assessment, Stark Learning identified that they could reduce development time significantly while at the same time allowing them to efficiently publish training content across multiple platforms using Unity as the rendering engine. Stark Learning points out that VE Studio enables more efficient and flexible development cycles due to its patented data-driven approach to content creation and management. Reducing cost and development time is a real win-win for their customers and Stark Learning.

Partnering with DiSTI extends STARK Learning's capabilities to deliver and support scalable learning solutions to industrial, energy and educational organizations across Europe. The partnership enables both companies to address businesses across the region.

John Cunningham, Chief Revenue Officer of the DiSTI Corporation, cites, "There is growing global demand for virtual and augmented reality solutions and end users and solutions developers such as STARK Learning are facing challenges when using traditional manual development methodologies. Hand-coded development is time-consuming, not scalable and expensive. VE Studio's training development platform approach allows organizations to significantly reduce development costs, use non-software developers to develop content and to scale training across the enterprise on desktop, tablet, VR and AR technologies. We look forward to working with STARK Learning as our Certified Solutions Partner to address virtual training needs of customers in Europe."

###

**About DiSTI**

The DiSTI Corporation is the world's leading provider of 3D virtual training solutions and graphical user interface software. DiSTI's VE Studio is the world's only platform for managing the development of complex 3D virtual environments for use on desktop, mobile, and virtual and mixed reality training applications. VE Studio manages the entire development process including requirements analysis, content development, and automated software builds and regression testing.

**About STARK Learning**

STARK Learning makes companies and professionals in the technical sectors stronger with e-learning, serious games, and VR training. In collaboration with our customers, we develop learning solutions that empower your employees. Providing innovative solutions to enable scalable learning for organizations as the strategic differentiator in the 21st century. STARK Learning has developed numerous solutions for corporations in the Industrial, Energy and Education sectors.
